
Independent Study Complexity Theory

Ryan Dougherty

Table of Contents

1	Review	3
2	Polynomial Hierarchy, Alternating TMs	4
3	Boolean Circuits	5
4	Randomization	6
5	Interactive Proofs	7
6	Quantum Computation	8
7	PCP Theorem	9
8	Decision Trees	10
9	Communication Complexity	11
10	Algebraic Computation Models	12
11	Counting Complexity	13
12	Average-Case Complexity	14
13	Hardness Amplification	15
14	Derandomization	16
15	Expanders/Extractors	17
16	PCP and Fourier Transform	18
17	Parameterized Complexity	19

1 Review

4 Independent Study – Complexity Theory

2 Polynomial Hierarchy, Alternating TMs

3 Boolean Circuits

6 Independent Study – Complexity Theory

4 Randomization

5 Interactive Proofs

8 Independent Study – Complexity Theory

6 Quantum Computation

7 PCP Theorem

10 Independent Study – Complexity Theory

8 Decision Trees

9 Communication Complexity

12 Independent Study – Complexity Theory

10 Algebraic Computation Models

11 Counting Complexity

14 Independent Study – Complexity Theory

12 Average-Case Complexity

13 Hardness Amplification

16 Independent Study – Complexity Theory

14 Derandomization

15 Expanders/Extractors

18 Independent Study – Complexity Theory

16 PCP and Fourier Transform

17 Parameterized Complexity
